

Earth Month: Building A Better Tomorrow

Sustainability

Sustainability is a never-ending journey, directly tied to every part of ATD's strategy evolution. We're pioneering a better future and creating a company and culture built to last.

Earth Month serves as a dedicated period to raise awareness about environmental issues and inspire collective action towards sustainability. Throughout April, people and organizations worldwide come together to advocate for the protection of our planet, promote eco-friendly practices, and drive positive change.

To succeed as a leading corporation for generations to come, we must deliver value not only to our investors, but also to the environment and the society we nurture inside and outside our company.

—Stuart Schuette, President & CEO

Sustainability at ATD

ATD takes action to improve environmental sustainability. We examine our ability to have a positive impact on our world by measuring direct reductions in greenhouse gas (GHG) **emissions, energy use, and waste.**

Our goal is to reduce our carbon footprint by replacing carbon-based sources of energy in our operations with renewable sources. [Click here](#) to read more about our strategy and download our sustainability reports.

Learn more about how to do your part with these tips for sustainable living:

Reduce, Reuse, Recycle

The classic mantra of sustainability still holds true. Reduce your consumption, reuse items whenever possible, and recycle materials to minimize waste.

Conserve Energy

Turn off lights, unplug electronics when not in use, use energy-efficient appliances, and consider renewable energy sources like solar panels.

Water Conservation

Fix leaks, take shorter showers, install water-saving devices like low-flow faucets and toilets, and collect rainwater for outdoor use.

Eat Sustainably

Choose locally grown, organic foods when possible to reduce carbon emissions from transportation and support sustainable farming practices. Reduce meat consumption or opt for plant-based alternatives.

Shop Responsibly

Support companies with transparent and sustainable practices. Look for eco-friendly and Fair Trade labels when purchasing products.

Reduce Single-Use Plastics

Minimize plastic waste by using reusable bags, bottles, and containers. Opt for products with minimal packaging.

Our commitment to sustainability principles is at the heart of what we do to achieve a brighter tomorrow. These principles act together as a compass needle pointing us toward our goals.

Sustainability is a never-ending journey, directly relevant to every part of ATD's strategy evolution. We're pioneering a better future, creating a company and culture built to last. As we continually seek to meet the needs of our stakeholders through business improvement, we believe in transparency. Each year we share the progress we're making with our sustainability initiatives.

2022 ESG Report

As we continually seek to meet the needs of our stakeholders through business improvement, we believe in transparency. Each year we share the progress we're making with our sustainability initiatives.

Supply-chain sustainability

We take a customer-focused approach to supply-chain and tire distribution, giving customers more control over purchases and delivery timing. We're leveraging our ability to bring the full spectrum of last mile capabilities, and dynamic route optimization.
